

# YOU CAN'T EVICT AN IDEA

## WHOSE TIME HAS COME COPS, CAPITALISM, AND REVOLUTION

The whole world has watched as police have pepper-sprayed, beaten and arrested non-violent protesters from California to New York.

This coordinated assault hasn't broken our spirits but it does raise critical questions: Why are politicians unleashing such brutal repression? How can we turn popular protest into victories against budget cuts and union-busting? What role can workers play in the fight for a better world? And ultimately, what kind of struggle will it take to uproot corporate greed, poverty and inequality once and for all?

Join us for a discussion on the politics we need to win fight for our future.
