

# Fight for a world without sexism!

## The Socialist Case for Gender Equality

Today's sexism—from widespread violence and degrading ideas to inequality at the workplace and unpaid labor at home—reaches into every corner of our lives. But sexism has not always existed. Women's oppression stems from the nature of our deeply unequal society, and a system that needs to divide and conquer in order to survive.

And people of all genders are fighting back! Grassroots mobilizations against sexual assault, victim-blaming and attacks on our reproductive rights are providing a glimpse of the potential to build a new movement for women's rights. And from Egypt to Yemen to Madrid, women are demanding a place at the forefront of struggles for democracy and economic justice.

Come join us for a discussion of how to carry these struggles forward to challenge the capitalist system as a whole—and win a world based on genuine equality and true democracy, run from the bottom up.
